Semi-Pneumatic Wheel Diagrams	

Since 1967, Hoosier Wheel has provided quality pneumatic and semi-pneumatic wheel assemblies to some of the world's leading OE manufacturers. Over the years we have grown and expanded our engineering and production capabilities to offer a variety of wheel assemblies to meet almost any need. Only one thing hasn't changed: our commitment to superior quality.

Our partnerships with multiple international tire sources allow us the flexibility to provide you the perfect tire and tread for any application. We will never relent in our pursuit of perfection and commitment to quality. Our promise to you is to manufacture a superior quality product, to your specifications, and deliver it on time. You have our word.

Call today - let's get rolling. **1.877.206.4762**

Over 4000 different wheel configurations, and counting. The possibilities are endless.

Pneumatic, semi-pneumatic, plastic, flat-free, or solid, Hoosier Wheel makes them all. Just give us your specs and our team will go to work. If you're not certain what you need, call us and we'll discuss the application, your requirements, and help you find the perfect solution.

A QUALITY promise.

Hoosier Wheel promises to manufacture competitively priced products that meet or exceed our customers' requirements for quality and delivery.

Hoosier Wheel's multiple production facilities use only the finest raw materials and manufacture each wheel assembly to strict quality standards, as evidenced by our ISO 9001:2008 registration.

Custom wheel assemblies built to spec made to last.

Don't see what you're looking for? Give us a call at 1.877.206.4762. We can engineer and manufacture a custom wheel assembly just for you.

PNEUMATIC

NEED FLATPROOFING? Tire Sealant or Polyurethane Foam Fill can be added to any pneumatic tire.

EXCEPTIONAL TURF PERFORMANCE

Turf tires must strike a delicate balance between performance and turf friendliness. Hoosier Wheel has developed a number of tire tread and profile combinations to achieve maximum performance and traction while minimizing turf damage. Is your equipment ready for a new aggressive look? Our new FLEX TURF line was designed with the professional user in mind. These tires combine a durable rubber compound, deep tread, and flat profile to achieve the dependability and performance required by commercial users. The FLEX TURF is ideal for ZTRs, riding mowers, and other grounds care equipment where traction and hill-holding is a must.

FLAT FREE TIRES

Do your customers require a commercial quality, flat-proof wheel? Our HOLLOWMATIC line of semi-pneumatic tires combine the dependability of an air-less tire with a cushioned ride to keep professionals up and running. HOLLOWMATIC tires are ideal for front casters on ZTRs, deck wheels on wide-area mowers, and other commercial grounds care equipment where durability is critical and downtime is a major concern. If your application requires a lighter, lower duty cycle tire option, our line of solid polyurethane tires may be the right choice. Urethane tires are ideal for walk-powered applications such as pressure washers, generators, and hand trucks where flat-proofing is desired, but the weight of a solid or semi-pneumatic rubber tire is a concern.

SEMI-PNEUMATIC AG TIRES

Planters, seeders, grain drills...we have tires for them all. Hoosier Wheel has been making semi-pneumatic tires for close to 50 years and this experience has allowed us to work with major OEMs to achieve their performance requirements in the fields of America. We are ready to work with your engineering teams to match your ideal performance and price point. We offer both solid and semi-pneumatic tires as well as steel and nylon rim construction. Our proprietary Ag tire compounds have withstood the rigorous environments of the fields and provided the dependability that farmers count on.

Wheel Component Options

Ball Bearings

Ball bearings offer the truest rolling motion and least friction of any bearing type. Ball bearings are pre-greased for reduced install time and long-life. Ball bearings are offered in a sealed configuration to reduce contamination and on-going maintenance requirements.

Precision

Non-Precision

Semi-Precision

Tapered Roller Bearings

Cup, cone, and seal bearings are ideal for heavier duty applications. These bearings are designed with tapered faces, which make them able to handle side and downward forces.

Bushings

Powdered metal bushings can be made of a variety of compounds and can be oil impregnated for continuous lubrication and rust prevention.

Nylon bushings are ideal for situations where metal bushings are not feasible. These bushings are an excellent alternative in washdown environments and are more economical than powdered metal bushings or ball bearings.

Nylon

Grease Fittings

Roller Bearings

thrust loads.

Grease fittings are available on most wheel assemblies.

Roller bearings are made of machined alloy steel and are contained

in a cage to form a self-contained unit. These bearings are suitable

for applications where the wheel is subject to severe shock or

How to Order

Hoosier Wheel makes the ordering process as simple and quick as possible. If you know some or all of your specs, fill in the form here and send it to us. This information will help expedite your order. If you'd rather not fill out the form, or if you're simply not sure what you need, just pick up the phone and speak with one of our knowledgeable representatives and we'll get the ball...or, in this case, the WHEEL, rolling.

To receive a quote, please send the completed form to Hoosier Wheel using one of the following:

Fax: 1.812.421.6908

- E-mail: sales@hoosierwheel.com
- Phone: 1.877.206.4762

Online form: HoosierWheel.com/OrderForm

Address: Hoosier Wheel P.O. Box 6447 Evansville, IN 47719

Custom Wheel Assemblies

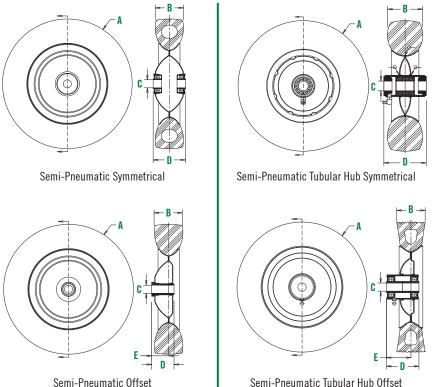

Over the years, Hoosier Wheel has been fortunate enough to be called upon to create some of the world's most unique wheel assemblies. Each one is distinctly engineered to our customers' specifications. We're proud of each and every assembly we've created. Take a look at some of our creations, then give us a call and let us build an assembly especially for you.

Pneumatic Wheels

Semi-Pneumatic Wheels

Semi-Pneumatic Tubular Hub Offset

The right wheel assembly for you:

Pneumatic – From light-duty home and garden use to heavy-duty construction applications, pneumatic wheels provide peak performance. Pneumatic wheels cushion the ride for smooth transportation. They distribute the load over a wide area and are ideal for rolling over uneven and soft surfaces. Quality workmanship equals rugged durability, greater dependability, and longer life.

Semi-Pneumatic – Never have a flat tire again. Semi-pneumatics have the advantage of NEVER going flat, which of course adds to their overall low maintenance. Durable construction gives you the peace of mind that you'll get years of reliable service, and Hoosier quality gives you the assurance that you're buying the best.

Plastic – Depending upon your need, our plastic wheel is a viable alternative. If your application calls for a wheel that's non-corrosive and won't rust, then we've got the wheel for you. They're lightweight, durable, and, best of all, economical.

Flat-Free – Our flat-free line offers durability across a wide array of applications. A commercial quality, flat-proof wheel, combined with the proper choice of tread, will increase productivity in a variety of ways. Don't let its cushioned ride fool you-this is one rugged setup.

Solid - In this case, the word "solid" speaks about more than just the tire construction. We're talking solid quality and durability for heavy capacity applications. These tires are also flat-proof for added peace of mind and reduced downtime.
